

# Cravit®

We make it real

## Portfolio

# The brand story

With Odoo are all business processes in order? Fact. And so intuitive that anyone can work with it? Absolute. So, one push of a button and start? Unfortunately not.

However simple the system is, process optimization is not. We are very honest about that. A business change like this requires time, attention and concessions across the entire organization. There will be successes, but also mistakes and frustrations. Inevitable, but certainly no reason not to proceed. Ultimately Odoo delivers more than what it cost. We promise.

As Odoo specialists, we are able to examine a company in detail. We test the objectives against the system and show how Odoo can work for you. We consider all possible obstacles and prepare your organization for this. This way we both know which steps we are going to take, but above all which barriers need to be overcome. We just show what others try to disguise. We are realistic. We keep both feet on the ground and focus on the final goal. Because only this way can we achieve change in a solid way.  
**We are Cravit. We make it real.**

## AT A GLANCE

*Odoo users* 40

*industry* Automotive

*Offices* 

*Customer since* 2021

*Website* [www.vitrite.com](http://www.vitrite.com)

Vitrite is a household name in Zeeland. The company was founded in 1893. Every year they make millions of precision components of metal and plastic for halogen and xenon lamps in cars. That enormous mountain of lamp sockets is due to robots equipped with cameras and machines that perform multiple actions while checking quality at the same time.

## SOME HIGHLIGHTS

- + Uses Odoo almost completely out of the box
- + Handle logistical transactions for 3 warehouses
- + Massive numbers of master data
- + Major change to move from SAP to Odoo
